### Individual Write Up

For the project3, I would like to say I contributed 5% on the modification. I optimize the user interface of the webpage, such as the background color and the outline of the link buttons. I am assigned to be responsible for the front-end part of the project, which mainly focuses on the HTML and CSS part. For the final project submission, I plan to fix some bugs related to the CSS outline and make sure the webpage looks straightforward and user-friendly.
